

---

Other cultures often expect a CV, but the expectations vary greatly. Please research CV writing tips and strategies for other countries as they will differ from the tips provided here.

In the United States, a CV is often used in higher education in the following ways:

- To focus on academic pursuits, omitting material not directly related to educational background/achievement.

- To address faculty roles such as teaching: courses taught/developed, research, service, professional memberships and presentations.

- To seek teaching or research positions.
